

Are you interested in your immune system?

Helfgott Research Institute is conducting a study on Small Intestine Bacterial Overgrowth, or SIBO.

To qualify, you must be:

- Between 18-65 years old
- **NOT** diagnosed with Inflammatory Bowel Disease, SIBO, Celiac Disease or lactose intolerance
- **NOT** experiencing symptoms that include diarrhea, bloating, and constipation
- Willing to take a 3-hour breath test with a 1-day dietary restriction, in addition to one blood draw
- Able to participate in 1 phone call and 1 in-person study visit

Receive a free food sensitivity test and a \$20 gift card
