I wrote a successful proposal, on behalf of the Oregon Master of Public Health (OMPH) Program, to participate in a national initiative supported by the W.K. Kellogg Foundation and the Community-Campus Partnerships for Health (CCPH). The OMPH Program was one of 12 schools and graduate programs of public health nationwide chosen to take part. The OMPH Program received consultation provided by members of the CCPH Consultancy Network on how to work toward the three program goals identified by the OMPH Initiative team. These goals included:

1. Improve recruitment and retention of students, faculty, and staff from underrepresented communities (specifically racial and ethnic communities) to produce a more diverse public health workforce as a key step in the elimination of racial and ethnic health disparities;

2. Ensure diversity and cultural competency are prioritized at each level of the OMPH Program;
3. Build programmatic capacity to engage communities in OMPH Program research, teaching and service activities, with particular attention to actions that prioritize the elimination of racial and ethnic health disparities.
